

What is Dermapen™ Microneedling?

Erase multiple skin concerns with a natural boost of collagen and elastin.

Dermapen™ microneedling is an effective, popular and minimally invasive procedure that targets a wide range of skin concerns, not just lines and wrinkles—although it does help keep skin looking younger.

DERMAPEN™ MICRONEEDLING TARGETS:

Signs of ageing, fine lines and wrinkles

Active acne or acne scars

Unwanted tattoos

Enlarged pores

Stretch marks

Pigmentation

Melasma

Rosacea

Hair loss

Scars

The professional Dermapen 4™ device offers amazing and long-lasting results by working with your patient's skin.

NATURAL REPAIR

Unlike injectable treatments, Dermapen™ microneedling is a natural process that stimulates the body's own repair and renewal process to create collagen.

Micro-fine needles are adjusted to different depths and speeds to create fractional puncture channels on the skin's surface. These micro-channels carry the Meso-Glide™ actives deep into the skin, increasing the procedure's effectiveness.

A Meso-Glide™ is a serum used during the procedure that's safe for infusion and chosen to help correct a specific skin concern.

PATIENT BENEFITS

Over 3 million Dermapen Treatments™ have now been performed worldwide. But why are they so popular?

PRECISE

All areas of the body, including face, lip area, ears, neck, chest, hands, back and scalp, can be treated with pinpoint precision.

EFFECTIVE

Dermapen™ microneedling promotes rapid lifting, firming and toning of facial features and contours. It evens out skin tone and texture and diminishes scars and stretch marks.

Multiple concerns can be treated in a single session with Dermapen 4™, thanks to the adjustable needle depth and oscillation speed.

COMFORTABLE

There's no need for numbing cream, thanks to advanced technology that ensures no dragging or tearing. And with up to 1,920 punctures achieved per second, the procedure is finished in no time.

CONVENIENT

Patients walk away with minimal side effects and almost no downtime. It's a "lunchtime procedure", making it an attractive option for those with a busy lifestyle.

THE ORIGINAL AND TRUSTED DERMAPEN™

Australian medical developer and DermapenWorld™ CEO Stene Marshall introduced Dermapen™ to the world in 2010, revolutionising the microneedling market.

The latest generation of our professional device, the Dermapen 4™, is backed by years of research and prototypes to offer far superior design, comfort, versatility and results.

IS DERMAPEN™ MICRONEEDLING SAFE?

Any treatment that draws blood or punctures the skin requires strict infection control to maintain patient and practitioner safety. DermapenWorld™ places enormous importance on education, protocols and hygiene for that reason.

ANTI-CONTAMINATION MANAGEMENT™ (ACM™)

DermapenWorld™ goes to stringent measures to ensure any clinic that uses our products has everything they need to provide the safest and most sterile procedures.

The ACM™ range helps you achieve this with:

- Sterilised needle cartridges with silicone seal and fluid guard to prevent backflow
- Hand sanitiser
- Biodegradable eco-gloves
- Nitrile gloves
- Sterile dressing kits to dispense and apply Meso-Glides™
- Disposable DpSleeves that roll over the Dermapen™ device
- ACM PROTECTION SHIELD™ that covers your face

Dp DERMACEUTICALS™

This revolutionary skincare line was specially designed for Dermapen™ microneedling. Thousands of practitioners around the globe have endorsed Dp Dermaceuticals™ for safe infusion into the skin during Dermapen™ microneedling procedures.

DERMAPEN TREATMENT™ VS DERMAPEN™ MICRONEEDLING

A microneedling procedure using a Dermapen™ is just one step in a holistic journey that extends beyond what happens in your clinic. All five stages of a true Dermapen Treatment™ are essential to achieving glowing, radiant skin for your patients.

They are:

1. Prepping skin and building resilience with a Dp Dermaceuticals™ routine.
2. Completing each procedure in line with DermapenWorld™ Protocols.
3. Upgrading the experience and results with boosters such as L.E.D. Light Therapy, ÜBER Peels™ and Masks.
4. Applying Dp Dermaceuticals™ post-procedure for optimum active ingredient absorption.
5. Equipping your patients with the knowledge and products to support their results at home.

When you become a DermapenWorld™ Authorised Treatment Provider, you gain access to the devices and products required to perform Dermapen Treatments™. You'll also be supported with ongoing education and resources, including our highly sought-after Protocols.

ARE YOU READY TO TAKE YOUR BUSINESS TO THE NEXT LEVEL?

Dermapen Treatments™ are a game-changer for any leading aesthetic clinic.
